

CASE OF RT LOWER URETERIC CALCULUS WITH STRICTURE

A Female Age: 55yrs

- Complain :- Pain at right renal angle since 3-4 days
Burning Micturation
Haematuria
NO H/O Any previous surgery
NO H/O Any drug reaction
NO H/O Any major illness

- USG SHOWS :- RT LOWER URETERIC CALCULUS
- **Operation 1 Plan : Right Ureteroscopy**
 - During ureteroscopy procedure it was not possible due to sever stricture in lower ureter
 - So DJ stent was kept
 - Further adv for CT IVP

- CT IVP Finding: Moderate Hydronephrosis due to stricture in lower ureter and Extravasation of dye.

- **Operation 2 Plan : Right Ureteric Reimplantation**
